

Acoustic
Baffles
with a twist

OPTIMA Baffles Curves

Integrated spiral anchors are factory fitted for easy alignment and installation.

Installation guide

Installation

OPTIMA Baffles Curves come complete with integrated spiral anchors for easy alignment and installation – no preparation or assembly is needed on site. Simply fix using a standard grid suspension system or hang individually for soffit using aircraft cable suspension system.

See our separate Installation Guide for full details.

Typical Applications

Great for schools, offices, transport hubs, leisure centres – or any large open areas where normal suspended grid fixing is not possible. They are ideal for low energy buildings using high thermal mass construction techniques, naturally lit areas with skylights or higher profile areas where a distinctive yet economical acoustic solution is needed.

Inspiring Great Spaces™

Why choose OPTIMA Baffles Curves?

With OPTIMA Baffles Curves, you can now create exciting interiors without compromising acoustic performance – even with modern exposed-soffit ceilings. It features pre-fitted spiral anchors, making them the easiest and quickest baffle solution around.

Get all the benefits of traditional rectangular baffles, but with an extra twist – a unique waveform edge that creates a fresh and calming visual.

Complete and ready to fix from a suspension grid or direct from the soffit, arrayed or staggered for a more realistic dynamic – either way, you'll be amazed at the visual they create.

All the performance you need and a high white paint finish: **the perfect light, airy and relaxing interior is just a curve away.**

Physical data

Item numbers

| Item nr. | Dimensions (mm) | Pieces / carton | Weight |
|----------|-----------------|-----------------|-----------|
| CS5163 | 400 x 1200 x 40 | 2pcs/ctn | 2,3 kg/pc |
| CS5164 | 400 x 1800 x 40 | 2pcs/ctn | 3,5 kg/pc |

Other dimensions and shapes available on request.

Colour* White (WH)

Edge Painted on edges

- Kit content**
- Individual Installation:
 - 1 Hanging wire kit required for 2 Baffles: CS 5135
 - 4x hanging wires
 - 4x cable adjusters
 - 4x cable finishing hooks
 - Grouped Installation:
 - For complete list of components please refer to the Installation Guide

Hanging kits to be ordered separately

*Other RAL colours available on request.

Dimensions

Module 400 x 1200 x 40 mm

Module 400 x 1800 x 40 mm

Performances

Armstrong OPTIMA Baffles Curves can significantly reduce background noise levels and reverberation times within spaces and enhance speech intelligibility. They provide absorption on all surfaces of the product either as a 'planar' absorber (α_w), when installed as a linear array; or as a 'discrete' absorber (EAA) when installed as separate decorative elements.

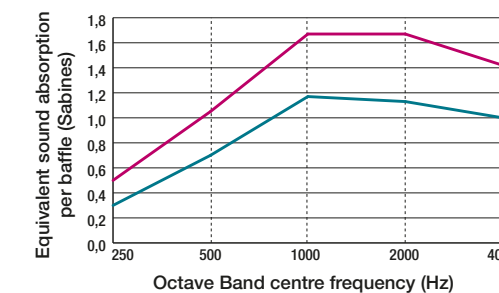

Acoustical Data - 1000 mm airspace

| Dimensions | EAA - Sabines* |
|----------------------------------|----------------|
| • OPTIMA Baffles - 400 x 1200 mm | 1.00 |
| • OPTIMA Baffles - 400 x 1800 mm | 1.45 |

* Average of 500-4000Hz, laboratory measurements with units suspended at 1000 mm, in accordance with EN ISO 354:2003. Contact the Armstrong Technical Sales team for further acoustic and performance information.

Discrete absorption

Acoustical Data - 1000 mm total depth (600 mm Void)

| Dimension | α_w |
|--|------------|
| • OPTIMA Baffles 400 mm (450 mm centres) | 0.60(MH) |

Planar absorption
